

Assignment -4

Assignment Date	01November2022
Student Name	Kumaresan.r
Student Roll Number	210919106048
Maximum Marks	2 Marks

Clone

2 Build

Run

Share

Now, build the image

A Docker image is a private file system just for your container. It provides all the files and code your container needs.

`cd getting-started`
`docker build -t docker101tutorial .` >>

Next Step

UI For Docker

This repo is deprecated. Development continues at: [portainer/portainer](#)

chat on github

UI For Docker is a web interface for the Docker Remote API. The goal is to provide a pure client side implementation so it is effortless to connect and manage docker.

Goals

- Minimal dependencies - I really want to keep this project a pure html/js app.
- Consistency - The web UI should be consistent with the commands found on the docker CLI.

Docker Pull Command

```
docker pull uifd/ui-for-docker
```
